

Eligibility and qualifying events checklist

Effective 1/1/2020

General eligibility provisions

To qualify for a Blue Shield of California Individual and Family Plan, you must:

- Be a California resident
- Not be enrolled in Medicare coverage
- Submit a request for coverage during our annual open enrollment, or experience a valid qualifying event and submit a request for coverage during a special enrollment period

California residency

A resident of California is an individual who:

- Has not established a permanent residence outside of California, and
- Intends to reside in California for at least 180 days of the year following his or her effective date of coverage

Both of these requirements apply, whether an application is submitted during open enrollment or a special enrollment period.

Important: For child-only applications, verification of parent or guardian residency is required.

Newborn babies and parents

These requirements also apply to newborn babies and their parents. For example, if an expecting couple from New York is on vacation, and the baby is born in California, the parents are not considered residents of California, and the baby is therefore not eligible for a Blue Shield plan. The residency of the parents or legal guardians determines the residency of the infant. These requirements apply whether the parents or legal guardians reside outside of California or outside the country. For surrogate mothers: Unless she is claiming parental rights, her residency does not determine the residency of the infant; the residency of the parents or legal guardians is what is important.

How to verify California residency

Applicants, spouses, or domestic partners for Blue Shield coverage must verify their residency by submitting either two different documents from column A, or one document from column A and one document from column B in the following table. Documentation supporting temporary or transient occupancy does not validate California residency requirements.

Note: For documentation supporting your California residence, the address must match the home address listed on your application.

Acceptable documentation of California residence (with acceptable dates)

Acceptable Documentation A

- California utility billing statement (gas, electricity, water, or cable). To support a permanent move, the billing statement must be for initial service.
- Valid California driver's license or California photo ID card. To support a permanent move, the ID must be newly issued.
- Paycheck stub for California employment. To support a permanent move, the paycheck stub must include the year-to-date pay that confirms new employment.

Acceptable Documentation B

- California DMV Driver Record Request printout
- California (540) tax returns with California as the home address
- California state aid or assistance program
- California car registration and/or California car insurance
- Military discharge papers (DD214) or Leave and Earnings statement (indicating California as state of record)
- California property taxes for your home
- California school transcripts, school registration, school ID, school housing contract (for applicants under age 18 applying solo)

The state of California requires that everyone have health insurance or pay a tax penalty. A Social Security number is requested on the application and will be used to inform the government that applicants have applied for coverage and should not be penalized. When a Social Security number is not provided for each adult applicant on the application, a valid California photo ID is required.

Special enrollment periods

Individuals experiencing a qualifying event will have a special enrollment period to apply for coverage. Documentation supporting eligibility is listed next to each of the qualifying events starting on page 4. The documentation is required and must be submitted to Blue Shield at the time of application.

The specific qualifying event may apply to the entire family or only to the person affected. For example, if a family experiences the birth of a child, the child could apply as an individual effective on the child's date of birth, or the entire family could apply effective as of the

newborn's date of birth. The qualifying event does not apply to the remainder of a family on a policy on which an individual no longer qualifies as a dependent.

Important things to know

- Providing the requested documentation does not guarantee approval for enrollment. All documentation submitted is subject to validation and must support the qualified event or eligibility requirements.
- Under no circumstances will coverage become effective prior to the qualifying event date.
- An application for coverage due to a qualifying event must be received within 60 days after the qualifying event. The ability to apply up to 60 days prior to a qualifying event date is limited to loss-of-coverage qualifying events only. For all other qualifying events, an application may only be submitted after the qualifying event has occurred. As an example, for a new-move qualifying event, an application must be submitted after the move has been completed and will not be valid prior to the move.
- Please be aware that effective dates differ based on the specific qualifying event.

Minimum essential coverage

An eligible individual or dependent who experiences a loss of minimum essential coverage has 60 days before and 60 days after the loss of coverage to enroll. This is intended to avoid a coverage gap when switching to the new plan. Loss of minimum essential coverage does not include failure to pay premiums, voluntary cancellation, or rescission of prior coverage.
