

Value-Based Tier Drugs for Blue Shield Value Drug Formulary

Select Blue Shield pharmacy plans have a Value-Based Tier Drug benefit¹

Value-Based Tier Drugs are specific preventive drugs taken when risk factors are present for a disease that has not manifested (or is asymptomatic), or to prevent the occurrence of a disease from which an individual has recovered.

Value-Based Tier Drugs are select generic and brand-name drugs that are FDA-approved for high blood pressure, high cholesterol, diabetes, and asthma. These drugs are covered at no charge, or at an otherwise reduced member cost share.

The following is a list of Value-Based Tier Drugs² used to treat these select chronic conditions. This list is current as of the date printed below and is subject to change.
