**PATIENT CLINICAL INFORMATION**

**Please read the following criteria and provide the requested documentation:**

**NOTE: Benefit limited to 30 days annually**

Care Mgmt Referral Line = **800-995-2800**

- Member is expected to benefit from short term SNF with a discharge plan to home
- Certification must be obtained **prior** to admission
- The preliminary treatment plan **must** be approved **prior** to admission and include:
  - **Documentation of need for daily inpatient care**
  - **Estimated length of stay**
  - **Medical and rehabilitation therapies**
  - **Preliminary long and short-term goals**
  - **Discharge plan including needed services and location**

**Note:** Benefits are **not** available for inpatient SNF care solely for management of tube feedings, for home level dialysis treatment, as an interim transition to long term care placement or for any non-covered services. Benefits are not available for court ordered placement in a skilled nursing facility.

**Please choose reason for admission, read requirements and provide documentation:**

**Rehabilitative Care**

- Therapy is intended to treat a documented decline in functional status due to recent illness, injury, disease, or surgical procedure(s).
- Patient is able to actively participate in Physical and/or Occupational Therapy at least 1 hour/day, at least five days/week. Active participation includes patient mental status demonstrating responsiveness to verbal or visual stimuli and the ability to follow simple commands.
- Patient requires more than minimal or light physical assistance for mobility and basic ADLs (i.e., bathing, dressing, eating, toileting).
- Patient requires minimum or greater level of assistance with mobility in more than one area of physical function (i.e., ambulation and transfers).
- Within twenty four (24) hours of admission to the SNF, patient receives a physical therapy evaluation; therapy treatment plan is developed and implemented; and short and long term functional goals are developed and agreed to by the patient (or patient proxy if patient is unable to give consent).

**Daily Nursing Care and Management**

- Inpatient skilled nursing care is required for ongoing assessment and management of unstable or complex medical conditions, including need for treatment modifications until the patient's condition is stabilized (i.e., septicemia, uncontrolled pain, severe respiratory disease, etc.); and
- Complex teaching and training with the individual or caregiver requiring 24-hour inpatient skilled setting (i.e., new ostomy, administration of multiple newly ordered infused and/or injected medications, wound care for a Stage 3 and/or Stage 4 wound or multiple Stage 2 wounds).

**Injections and infusions**

- Medically necessary administration of multiple intravenous (IV), intramuscular (IM) and/or subcutaneous (SQ) medications for new and/or complex needs
- At least one of the medications is administered every 8 hours or more frequently

**Ventilator and/or tracheostomy**

- Active weaning of the ventilator and/or tracheostomy or patient/caregiver education to prepare for patient return to a home setting (other than long term care) with ventilator and/or tracheostomy; and
- Patient care requires availability of a respiratory therapist on site in the SNF 24 hours/day; and

**Fax Number: 1-888-619-0492**

**Phone Number: 1-800-995-2800**

Revised: January 2024

Effective: January 2019

**PATIENT CLINICAL INFORMATION**

- Respiratory management is directed by a pulmonologist who evaluates patient within 12 hours of admission and at least weekly thereafter.

**Respiratory Treatment other than tracheostomy or ventilator**

- Patient care requires respiratory therapy available on site in the SNF 24 hours/day; and
- Chest Physiotherapy (PT) at least three (3) times/day;
- New respiratory treatments to stabilize new medical conditions, including new use of oxygen and respiratory nebulization therapies more than three (3) times/day;
- Nasopharyngeal or tracheal suctioning on a frequent basis (i.e., at least every four hours).

**Ostomy Care**

- Management of and patient/caregiver education regarding a new colostomy or ileostomy during the early post-operative period and/or related to complications to prepare patient for home.
- Management and teaching must be at a level that cannot be performed in an alternative care setting, such as the patient's home, long term care facility, outpatient, etc.

**Complex Wound Care**

- Extensive treatment (i.e., packing, debridement, irrigation) of Stage 3, Stage 4 or multiple Stage 2 decubitus ulcers or other complicated wounds);
- Complex treatment of wounds requiring multiple dressing changes within a 24hr period (at least every 8 hours) and the treatment cannot be safely performed in the outpatient, home, or long-term care facility setting; or
- Complex treatment of extensive skin disorders, requiring frequent treatment (at least every 8 hours) and skilled observation and assessment.
- Skilled observation and assessment of each wound must be documented daily and reflect any changes in the wound status.
