

Fall prevention resource list: Stop a fall, save a life

Did you know that every 11 seconds, an older adult is treated in the emergency room for a fall and every 20 minutes, an older adult dies from one?¹ Given these disturbing statistics, fall prevention is a priority we share with you and your patients. We have carefully chosen the resources in this document and organized them so that you can quickly access fall assessment and prevention information. Some links are for you and your staff. Others are resources you can share with your patients to take home in their care planning.
