

Mission-driven, Not-for-profit, California-based health plan

CA focused

The Blue Shield of California Foundation is one of the largest private contributors to the state's community clinics and anti-domestic violence programs.

The Foundation also provides grants to organizations serving the uninsured, underinsured and Medi-Cal populations.

Over the past decade, Blue Shield has **contributed more than \$325 million to the Foundation.**

Not-for-profit

Blue Shield operates to serve its members and advance its mission.

We have pledged to limit our annual net income to 2% of revenue, and as a result we have **returned \$560 million** to California customers and communities.

Mission driven

Ensure all Californians have access to **high-quality health care at an affordable price.**

Health care innovation

20+ ACO (accountable care organization) collaborations cover 263,000 members, improve patient outcomes and have generated more than **\$300 million in aggregate cost savings.**

First health plan in the country to put forth a specific proposal for universal health coverage – eight years before Affordable Care Act.

CA based

Blue Shield employs **more than 5,000 people** and is among the largest employers in San Francisco and El Dorado counties, with a significant presence in Los Angeles County.

A new facility in Rancho Cordova will further expand the company's economic presence in the Sacramento region.
