Improve Practice Efficiencies and Patient/Provider Joy by Asking “What matters to you?”
Learning objectives

After completing this webinar, you will be able to:

• Explain the relationship between Health Outcome Survey (HOS) scores and improved patient communication.

• Define the “What matters to you?” (WMTY) patient engagement approach.

• State examples of how asking, listening, and doing “what mattered” improved patient experience, promoted care efficiency, and brought joy to work.

• List time saving tips for integrating WMTY into busy clinical practice settings.

• Locate resources and services that can help support WMTY conversations.

This presentation and a link to the recording will be emailed to you within five (5) business days.
“What matters to you?” and the HOS survey
Health Outcomes Survey (HOS) overview

- HOS assesses the ability of a Medicare Advantage (MA) organization, like Blue Shield, to maintain or improve the physical and mental health of its members over time.

- It is used by the Centers for Medicare & Medicaid Services (CMS) to evaluate patients’ perception of you, your staff, and Blue Shield of California.

- HOS (and CAHPS) ratings account for more than a quarter of the overall CMS Star quality rating.

- A 5-Star rating increases our enrollment and brings more patients to your practice.

- We believe integrating WMTY into your practice at multiple levels can positively impact these scores.
A 2009 meta-analysis of 127 studies assessing the link between patient treatment adherence and physician-patient communication found:

- 19% higher risk of non-adherence among patients whose physician communicated poorly.
- Substantial and significant improvements in adherence among patients whose physicians participated in communication skills training.

WMTY is a simple to learn and use motivational interviewing (MI) tactic.

- MI is a collaborative person-centered communication approach designed to elicit and strengthen motivation for change.
- Speaking to your patients in plain language and asking WMTY can help improve adherence.
- Evidence points to the fact that very brief (5-minute) MI sessions have positive results, particularly when patients are highly resistant to change.†
- Using the WMTY methodology helps elicit meaningful conversations; ones that patients are more likely to remember when completing the HOS.

Multiple admissions for heart failure

Always on Saturdays!
CHF Treatment Plan

- Manage signs & symptoms of heart failure exacerbation
  - Low sodium diet
  - Fluid restrictions
As a clinician... What might you do differently?

What *mattered* was having lunch with his ROMEO group.
**CHF Treatment Plan**
- Manage signs & symptoms of heart failure exacerbation
- **Low sodium diet**
- Fluid restrictions

**Patient Goal WMTY**
- **Weekly Lunch with my ROMEO Group (Retired Old Men Eating Out)**

**WMTY Aligned Care Plan**
- Extra water pill after high salt meals

Doing what matters!
Asking, listening and *doing what matters* can impact patient experience.

- Care that is coordinated! I want to feel like my care team communicates with each other.
- I want to feel respected by my healthcare team.
- I need help navigating the system. I don’t understand what services I am eligible for.
- An appointment time that is convenient to me.
- A clean bathroom.
The evidence

WMTY conversations help healthcare teams understand what is “most important” to our patients, leading to high quality care delivery, improved PX, and improved patient-provider relationships.

Agreeing on “what matters” identified as one of five practices with potential to enhance physician presence and meaningful connection with patients in the clinical encounter.

Age-Friendly Health System: 4Ms Framework

What Matters
Know and align care with each older adult’s specific health outcome goals and care preferences including, but not limited to, end-of-life care, and across settings of care.

Medication
If medication is necessary, use Age-Friendly medication that does not interfere with What Matters to the older adult, Mobility, or Mentation across settings of care.

Mentation
Prevent, identify, treat, and manage dementia, depression, and delirium across settings of care.

Mobility
Ensure that older adults move safely every day in order to maintain function and do What Matters.

Age Friendly Health Systems: Guide to Using the 4Ms in the Care of Older Adults. April 2019 (available at IHI)
WMTY is one of four steps for leaders outlined in the IHI “Joy in Work Framework”

1. Ask staff, “What matters to you?”
2. Identify unique impediments to joy in work in the local context.
3. Commit to a systems approach to making joy in work a shared responsibility at all levels of the organization.
4. Use improvement science to test approaches to improving joy in your organizations.

What matters to you? in action
A personal story: Jennifer

*What matters to you?*

Impact of asking WMTY

- WMTY was implemented across all units at the Royal Free Hospital in London
- Staff surveyed about their experience

**Asking the WMTY question**
- 67% reported the question led to a change in an aspect of their care /intervention
- 80% shared the information they learned with other professionals
- 91% of staff reported their conversations with patients were enhanced

*Communication with Karen Turner, Royal Free*
WMTY: A global movement

- Norway
- Denmark
- New Zealand
- Canada
- Australia
An example from Scotland
Implemented *What matters* on a geriatrics ward

Meet Barbara
Each patient completed What’s important to me
Barbara

What's important to me

I was a WRVS volunteer
I lived in Rio de Janeiro for 42 yrs
I can speak Portuguese
I was in the Women's Air Force
My son Malcolm + daughter Moira
I did a lot of charity work
I am partially sighted
I have an M.B.E!
Rose’s story
How will we know that a change is an improvement?

**Process Measures**
- Did we ask patients to complete a what matters poster?
- Number of completed “What Matters to Me” posters

**Outcomes Data**
- Number of falls on the ward
- # of patient complaints
- Patient & staff satisfaction survey
Using data to drive improvement

Baseline median = 14

New median = 8

43% reduction

Number of falls

Ward 54
Langlands Unit
Patient satisfaction

• Reduction in formal complaints across the four wards by 50%.
• One ward has not received any formal complaints for 457 days and counting!
• Increased patient/carer and staff satisfaction.
Staff feedback

“This has allowed me to see my patient in a new light.”
– SCN

“It has made me more confident in dealing with patients with dementia.”
– HCSW

“I was skeptical at first, I thought I knew my patients, I was wrong.”
– Staff Nurse

“It helps build a bond between patient and staff.”
– Activities Coordinator
Creating a “movement”

Digging deeper: Identifying root causes
Capturing WMTY stories of impact

We asked. . . .  They said. . . .  We did. . . .

“What matters to you?”

“What matters to me is…
“Grandpa drinks too much and we don’t know what to do”

We connected grandpa to alcohol treatment & the family to AL-ANON
Time saving tips for integrating WMTY into your practice
Asking WMTY helps prioritize

Getting to the heart of the most important issue more quickly saves time and helps you partner with patients to create care plans that work for them.
Do *what matters*
Be willing to shift your mindset

How can a patient “eat healthy” when there is NO food on the table to feed their children?

• The plan needs to work for the patient even if it is not what you think is the most important priority for their health.
“Oh Doctor, one more thing ...

I sometimes get this pressure in my chest ...
Surveying at the beginning of the visit

“Anything else? Anything else? Anything else?”

You do not need to address all issues identified during surveying at the visit.

Often patients just want to make sure that their doctor is not concerned.
Collaborative agenda setting

After surveying:

Collaborate with the patient to set the agenda for the visit

- “So today we have 15 min together. I think it is very important that speak about ___. What is your priority or WMTY?”

- Empower the patient to prioritize how they want to spend the time and hold them accountable
  
- “So, we have 10 minutes left, it sounds like you would like to shift our agenda and speak more about ___. That is OK, but we might not have as much time to speak about ___. Does that work for you?”
What can you do?

• **ASK** your patients, your colleagues, and your family about what matters to them.
• Really **LISTEN** to what they say and
• **DO** what matters!
  • Practice little acts of kindness
  • Meet people where they are at
  • Adjust care plans
  • Notice the good things
  • Take care of yourselves

INTRODUCTION

What Matters To You?

What is WMTY?
Healthcare providers worldwide, are invited to add one simple question to every patient interaction, each and every day, in order to improve care. That question is, “What matters to you?” This global movement started in 2014, with the simple goal of encouraging meaningful conversations between patients, caregivers, families, and their healthcare providers.

Why is it important?
Providing patient-centered care is important because it results in better outcomes for patients and greater satisfaction with care. Asking “What Matters to You?” supports this by putting the patient’s voice at the center of care, by focusing on what matters to them.

What’s in it for me?

PATIENTS
- My care team co-designs my care plan based on what matters to me
- I feel that my care team really cares about me and this improves my overall experience

STAFF
- I feel that my work is more meaningful. I can provide care that meets my patient’s preferences.
- I feel more engaged in my work
- I find joy in my work
- I have an increased sense of partnership with my organization, team members and patients
