

**capsaicin (Qutenza)****Medical Benefit Drug Policy****Place of Service**

Infusion Center Administration

Office Administration

Outpatient Facility Infusion Administration

**Drug Details****USP Category:** DERMATOLOGICAL AGENTS**Mechanism of Action:** Transient receptor potential vanilloid-1 receptors (TRPV1) channel agonist**HCPCS:**

J7336: Capsaicin 8% patch, per square centimeter

**How Supplied:**Qutenza patch contains 8% capsaicin (640 mcg/cm<sup>2</sup>) 280 cm<sup>2</sup>. Each patch contains a total of 179 mg of capsaicin.**Condition(s) listed in policy** *(see coverage criteria for details)*

- Diabetic Peripheral Neuropathy (DPN)
- Postherpetic Neuralgia (PHN)

Any condition not listed in this policy requires a review to confirm it is medically necessary. For conditions that have not been approved for intended use by the Food and Drug Administration (i.e., off-label use), the criteria outlined in the California Code of Regulations (CCR), Title 22, Section 51303 and 51313 must be met.

**Special Instructions and Pertinent Information**

Provider must submit documentation (such as office chart notes, lab results or other clinical information) to ensure the member has met all medical necessity requirements.

The member's specific benefit may impact drug coverage. Other utilization management processes, and/or legal restrictions may take precedence over the application of this clinical criteria.

**Coverage Criteria****The following condition(s) require Prior Authorization/Preservice.****Diabetic Peripheral Neuropathy (DPN)****Meets medical necessity if all the following are met:**

1. Inadequate response, intolerable side effect(s), or contraindication to a self-administered topical preparation (e.g., capsaicin cream) used for DPN
2. If patient is less than 65 years old: Inadequate response, intolerable side effect(s) or contraindication to at least two oral drugs (e.g., tricyclic antidepressants, SNRIs, anticonvulsants) used to treat DPN

**Covered Doses:**

Up to 4 patches applied topically per treatment session, and not more frequently than every 3 months

**Coverage Period:**

Initial: 3 months

Reauthorization: Yearly based upon continued response to treatment.

**ICD-10:**

E11.21

**Postherpetic Neuralgia (PHN)****Meets medical necessity if all the following are met:**

1. Inadequate response, intolerable side effect(s), or contraindication to self-administered topical patch (e.g. lidocaine patch) used for PHN
2. If patient is less than 65 years old: Inadequate response, intolerable side effect(s) or contraindication to at least two oral drugs (e.g. tricyclic antidepressants and anticonvulsants) used to treat PHN

**Covered Doses:**

Up to 4 patches applied topically per treatment session, and not more frequently than every 3 months

**Coverage Period:**

Initial: 3 months

Reauthorization: Yearly based upon continued response to treatment.

**ICD-10:**

B02.21, B02.22, B02.23, B02.24, B02.29
